

UNIGOLD INC.

First Quarter – Interim Report

March 31, 2004

Notice to Readers

The consolidated financial statements and the accompanying notes thereto contained in this report have not been reviewed or audited by the Company's auditor.

UNIGOLD INC.

Management Discussion and Analysis of Financial Results

The following discussion and analysis of the operating results and financial condition of Unigold Inc. (the "Company") should be read in conjunction with the consolidated financial statements of the Company and notes thereto for the quarter ended March 31, 2004. Said financial statements were prepared in accordance with Canadian generally accepted accounting principles, but have not been reviewed or audited by the Company's auditors.

Overview

The Company is engaged in the exploration and development of mineral properties. Currently, the Company has interests in three principal mineral properties located in the Dominican Republic known as Neita, Sabaneta and Los Guandules. The interests in these properties are held through the Company's subsidiary, Unigold Resources Inc.

In addition to the interests currently held by the Company in mineral properties, management of the Company reviews opportunities to acquire interests in other appropriate mineral properties as such opportunities become available to the Company.

Exploration Update

In December 2003 the Company commenced a drilling program on the Neita property in order to assist in evaluating the mineral potential of the property. To date, 10 diamond drill holes have been completed on the Los Candelones Gold Deposit (an area within the Neita property) for a total of 1,012 metres; 6 holes on the Los Candelones West and 4 holes on Los Candelones East located about 300 metres on strike and to the southeast of Los Candelones West. These diamond drill holes are the beginning of a 5,000-metre program designed to expand the known mineralization on the Los Candelones Gold Deposit and to evaluate two other mineralized alteration zones located on the Neita property. During the first quarter of 2004, a geophysical consulting company based in Toronto, has mobilized on the Neita property to conduct a minimum of 50 line kilometers of induced polarization ("IP") on the Los Candelones, El Corozo and Montazo-Guano mineralized targets.

As a result of the drilling program, the known strike length of the mineralization on the Los Candelones Gold Deposit has been increased to the northwest a total of 100 metres and also shown that the mineralization continues down dip in excess of 175 metres and remains wide open to depth. The overall grade potential of the mineralized zone has been increased with hole SC27 which assayed 1.6 g/t gold over 68 metres including a central core which ran 2.1 g/t over 47 metres and with the adjacent and most northwesterly mineralized hole SC29 which assays 2.1 g/t over 61 metres including 3.1 g/t over 31 metres. Drill holes SC30 and SC31 drilled as step outs, on a presumed northwest extension of the mineralized zone are barren. This zone either pinches out to the northwest or has been offset by northeast trending faulting. Additional detailed groundwork is required to determine which. On strike to the southeast about 600 metres from hole SC29, the last hole (SC35) in the recent 10 hole diamond drill program assayed 1.51 g/t gold from surface down to 48 metres. The previous hole to this, SC34 which was collared about 100 metres south of hole SC35, was drilled due westward in the wrong direction to properly intersect a parallel mineralized zone and still returned values of 0.55 g/t gold over the upper 9 metres.

A total of 13.2 line-kilometres of IP on 11 N-S trending lines spaced 200 metres apart have recently been completed on the Los Candelones Gold Deposit. The IP chargeability and resistivity have outlined three main parallel NW-SE trending structures interpreted to be sulphide-rich with one of the structures partly coincident with the existing diamond drilling and known to be sulphide-rich and gold bearing. The ground IP geophysics on the Los Candelones area suggests that the Los Candelones West and Los Candelones East mineralized zones are in fact one continuous structure with a strike length in excess of 700 metres with perhaps some local structural offsetting. There is excellent potential to increase resources on the one chargeability high zone, which has seen drilling over a strike length of 700 metres, and on the other two parallel zones which have strike lengths in excess of 700 metres. Unigold is presently compiling and evaluating all available geological, structural, geochemical and geophysical data to best position the

drill holes for additional definition diamond drilling. A minimum program of about 20 drill holes is warranted to begin to outline the gold mineralized zones.

Exploration results on the El Corozo alteration zone and structure, which is known to be 1.5 km by 2 km in size is very encouraging. Stream sediment samples returned values up to 1.1 g/t gold and soil sampling has returned gold anomalies up to 500 ppb. The IP geophysical survey comprised of four east-west trending lines spaced 400 metres apart on El Corozo also outlined excellent chargeability high zones that warrant detailed follow-up exploration. The amplitude of these IP chargeability high zones are greater than the known gold mineralized zone on Los Candelones. A five-hole diamond drill program is just being completed on the El Corozo alteration zone and structure targeting a silicified, hydrothermally altered hill with a coincident gold in soil anomaly and with siliceous volcanics in a trench assaying up to 1.6 g/t gold. Partial gold assay results from the first half of hole SCO-01 are poor. The bottom of hole SCO-01 and the other drill hole assays are pending. Additional diamond drilling is warranted to evaluate the two strong chargeability highs transacting the area.

The largest silicification and hydrothermal alteration zone on the Neita property occurs in the Montazo-Guano area. This target trends east-west and has a length of about 3 km and a width of about 1 km. Low but consistent gold values in trenching averaging 0.3 g/t is widespread. Previous trenching on the eastern margin of the alteration zone returned values up to 0.44 g/t gold over 90 metres while trenching on the western margin of the zone, located 2.5 km away, returned values up to 0.54 g/t gold over 100 metres. Unigold is presently undertaking geological mapping and an IP geophysical survey in search of areas of increased sulphide content that should contain significant gold. Four north-south trending IP lines spaced 400 metres apart have been completed over the area and preliminary results show a strong chargeability high trending east-west across the area. This zone requires detailed ground follow-up by soil geochemistry and trenching to prioritize the chargeability high zones and then followed by diamond drilling.

Selected Annual Information

The following selected financial information is derived from the financial statements of the Company for the 12 month year ended December 31, 2003, for the 15 month year ended December 31, 2002 and for the 12 month year ended September 30, 2001.

	<u>Dec 31, 2003</u>	<u>Dec 31, 2002</u>	<u>Sept. 30, 2001</u>
	(in thousands except for share amounts)		
Net Revenues	\$3	nil	\$62
Net income (loss) for the year	\$(1,226)	\$1,057	\$(2,381)
Per share	\$(0.07)	\$0.15	\$(0.42)
Per share (fully diluted)	\$(0.07)	\$0.15	\$(0.42)
Total assets	\$3,022	\$1,377	\$64
Total long-term debt	nil	nil	\$1,588
Cash dividends per share	nil	nil	nil

The loss of \$1,226,000 recorded in 2003 was mostly due to net administrative expenses of \$1,209,000 plus a loss of \$17,000 from the sale of marketable securities.

The net income recorded in 2002 was mainly due to a \$1,805,000 gain on the settlement of long-term debt and accrued interest, offset by net administrative expenses of \$748,000.

The net loss of \$2,381,000 recorded in 2001 was mostly due to a write-off of investments and other assets of \$2,164,000 and net administrative expenses of \$217,000.

Results of Operations

Net general and administrative costs incurred during the first quarter of 2004 were \$283,761 compared to \$502,299 during the same period last year. 2003 included non-recurring costs associated with the start-up of the Company; therefore a comparison between the two periods is not meaningful.

Travel, promotion and business development expenses in the first quarter of 2004 of \$92,804 are due principally to the necessity of travel to the Dominican Republic, to the investor relations and marketing activities of management as they seek to educate investors about developments at the Company and raise the necessary finance for its ongoing activities, and, to costs associated in reviewing opportunities to acquire other mineral properties. Some of these costs will not recur and it's expected that travel costs will be at a much-reduced level for the balance of this year.

Salaries and wages for the quarter were \$82,840 and are anticipated to be approximately \$320,000 per year at current staffing levels. Other general and administrative expenses were in line with anticipated levels and are expected to continue.

Quarterly Information

The following is a summary of selected financial information for the quarterly periods indicated (all amounts are in \$000's, except for the share amounts):

	<u>2004</u>		<u>2003</u>		<u>2002</u>			
	Mar 31	Dec 31	Sep 30	Jun 30	Mar 31	Dec 31	Sep 30	Jun 30
Net Revenues	\$1	\$1	nil	\$1	\$1	nil	nil	nil
Net income (loss)	\$(284)	\$(323)	\$(251)	\$(150)	\$(502)	\$(384)	1,674	\$(108)
Per share	\$(0.01)	\$(0.02)	\$(0.01)	\$(0.01)	\$(0.03)	\$(0.04)	\$0.16	\$(0.02)

Liquidity and Financial Position

Cash on hand as of March 31, 2004 was \$725,341, down \$668,561 from the year ended December 31, 2003. Working capital has been reduced by \$536,472 during this quarter to \$765,093 from \$1,301,565. The principal source of cash for use in operations has been from the issue of common shares. The Company has no producing properties and, consequently, has no current operating income or cash flow. The continuing development of the Company's properties therefore depends on the Company's ability to obtain additional required financing. Financing of the Company's activities to date has been primarily obtained from equity issues. It is expected that the Company's activities will continue to be funded through external financing.

Outlook

The outlook for the Company over the next six months is good. The Neita property is host to about 20 alteration zones, as interpreted by airborne geophysics, some of which have coincident gold, copper or zinc stream sediment anomalies that will be evaluated in the near future. A 22 kilometer long structural contact zone between the Upper and Lower Tiro volcanic rocks has been shown to carry gold and copper mineralization at three widely spaced locations. This zone has seen very little work and is a high priority exploration target. Exploration over the past six months has also greatly enhanced the gold targets at Los Candelones, El Corozo and Montazo-Guano.

On the Los Candelones Gold Deposit, the diamond drilling has outlined a 700 metre long gold mineralized zone with local structural offsets. IP Geophysics on this area has outlined what is interpreted as three parallel chargeability high targets only one of which has seen any amount of diamond drilling. This area warrants a 20-hole diamond drill program over the next six months to better define the mineralized zones.

The IP geophysical survey has also outlined excellent chargeability targets at El Corozo and Montazo-Guano. Detailed geology and structural interpretation are being undertaken at this time. Diamond drilling has commenced at El Corozo and is warranted on Montazo-Guano in the future.

Qualified Person

The foregoing scientific and technical information has been prepared or reviewed by John P. Thompson, the President and Chief Executive Officer of the Company. Mr. Thompson is a “qualified person” within the meaning of National Instrument 43-101. Mr. Thompson also supervises all work associated with the Company’s exploration programs in the Dominican Republic.

Risks and Uncertainties

At the present time, the Company does not hold any interest in a mining property in production. The Company’s viability and potential success lie in its ability to develop, exploit and generate revenue out of mineral deposits. Revenues, profitability and cash flow from any future mining operations involving the Company will be influenced by precious and/or base metal prices and by the relationship of such prices to production costs. Such prices have fluctuated widely and are affected by numerous factors beyond the Company’s control.

The Company has limited financial resources and there is no assurance that additional funding will be available to it for further exploration and development of its projects or to fulfill its obligations under applicable agreements. Although the Company has been successful in the past in obtaining financing through the sale of equity securities, there can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of the property interests of the Company with the possible dilution or loss of such interests.

Forward Looking Statements

The Management Discussion and Analysis of Financial Results, contains certain forward-looking statements related to, among other things, expected future events and the financial and operating results of the Company. Forward-looking statements are subject to inherent risks and uncertainties including, but not limited to, market and general economic conditions, changes in regulatory environments affecting the Company’s business and the availability and terms of financing. Consequently, actual results and events may differ materially from those included in, contemplated or implied by such forward-looking statements for a variety of reasons.

Additional information relating to the Company may be accessed by visiting the SEDAR website at www.sedar.com.

UNIGOLD INC.

Notes to the Consolidated Financial Statements

(Unaudited – Canadian \$)

1. Basis of Accounting

The accompanying unaudited financial statements are prepared in accordance with Canadian generally accepted accounting principles (“GAAP”). They do not include all of the information and disclosures required by Canadian GAAP for annual financial statements. In the opinion of management, all adjustments considered necessary for fair presentation have been included in these financial statements. Operating results for the period ended March 31, 2004 are not necessarily indicative of the results that may be expected for the full year ending December 31, 2004. For further information see the Company’s consolidated financial statements including the notes thereto included in the Annual Report for the year ended December 31, 2003.

2. Change in Accounting Policy – Stock Based Compensation

The Company has adopted the new recommendations of the Canadian Institute of Chartered Accountants (“CICA”) handbook Section 3870 with respect to stock based compensation awards to employees of the Company. This section establishes standards for the recognition, measurement and disclosure of stock-based compensation and other stock-based payments made in exchange for goods and services. These new recommendations require that compensation for all awards be measured and recorded in the financial statements at fair value for fiscal years beginning on or after January 1, 2004.

The Company, as permitted by Section 3870, has chosen to apply this Section retroactively in fiscal year 2004 with a restatement of deficit as at January 1, 2004. The cumulative effect at January 1, 2004 of this accounting change is an increase in deficit of \$686,100 and an increase in contributed surplus of \$686,100. Had the December 31, 2003 financial statements been restated, expenses would have increased by \$686,100 and basic loss per share would have increased by \$0.04.

3. Mineral Properties and Deferred Exploration Costs

Mineral properties and deferred exploration costs consist of the following:

	<u>March 31, 2004</u>		<u>December 31, 2003</u>	
	<u>Mineral Properties</u>	<u>Deferred exploration costs</u>	<u>Mineral properties</u>	<u>Deferred exploration costs</u>
Neita and Sabaneta	\$313,452	\$1,089,548	\$313,452	\$817,784
Los Guandules	<u>83,427</u>	<u>----</u>	<u>83,427</u>	<u>----</u>
	<u>\$396,879</u>	<u>\$1,089,548</u>	<u>\$396,879</u>	<u>\$817,784</u>

Neita Property

The Neita Property covers an area of 25,221 hectares in Central Cordillera of northwestern Dominican Republic. Pursuant to the Neita Exploration Contract, the Dominican Republic granted the Company the exploration rights for gold, silver, zinc, copper and all associated minerals in the property, as well as the sole and exclusive option for the commercial mining of the mineral deposits. The Company is required to pay to the Dominican Republic surface tax in a nominal amount, as well as pay the following amounts:

- (a) US\$30,000 on the day signing the contract (paid);
- (b) US\$20,000 on July 10, 2003 (paid);

- (c) US\$50,000 on July 10, 2004;
- (d) US\$50,000 on July 10, 2005.

In the event that mining commences on the Neita property, the Company will be obligated to pay tax equal to 25% of its net taxable income, plus a further 5% of net taxable income to municipalities, as well as payment of the aforementioned surface tax. The consideration was determined following arm's length negotiations between the Dominican Republic and the Company following a process of public invitation to tender.

Sabaneta Property

The Sabaneta Property is located on the northwestern part of the Dominican Republic. The property covers an area of 55,720 hectares. Pursuant to the Sabaneta Exploration Contract, the Dominican Republic granted the Company the exploration rights for gold, silver, zinc, copper and all associated minerals in the property, as well as the sole and exclusive option for the commercial mining of the mineral deposits. The Company is required to pay to the Dominican Republic surface tax in a nominal amount, as well as pay the following amounts:

- (a) US\$30,000 on the day signing the contract (paid);
- (b) US\$20,000 on July 10, 2003 (paid);
- (c) US\$50,000 on July 10, 2004;
- (d) US\$50,000 on July 10, 2005.

In the event that mining commences on the Sabaneta Property, the Company will be obligated to pay tax equal to 25% of its net taxable income, plus a further 5% of net taxable income to municipalities, as well as payment of the aforementioned surface tax. The consideration was determined following arm's length negotiations between the Dominican Republic and the Company following a process of public invitation to tender.

Los Guandules

On February 16, 2004, the Company entered into a definitive agreement with Americana de Explotaciones Mineras, S.A. ("Americana") and the shareholders thereof relating to the acquisition by the Company of the Los Guandules concession in Municipalities of Elias Pina and Dajabon, Dominican Republic. Under the terms of the agreement, in consideration for the payment of US\$30,000 (which has been previously paid) and the issue of an aggregate of 330,000 common shares of the Company, the Company will be granted an option to acquire, at its election, the rights of Americana under the Los Guandules concession agreement or all of the shares of Americana for the price of \$1.00 at any time for a period of five years. Completion of the transaction is subject to the receipt of all required regulatory approvals.

Royalty Interest, Dominican Republic

The Company has entered into a letter of intent with the Dominican Republic Government ("DRG") to purchase a 3.2% net smelter return ("NSR") held by the DRG on the Pueblo Viejo gold deposit currently being evaluated by Placer Dome Inc. The Company would be entitled to earn up to US\$175 million from future revenues generated from the 3.2% NSR. Revenues in excess of US\$175 million would be shared 40/60 between the Company and the DRG. In return the Company will make a payment of US\$21,362,000 upon the signing of a formal agreement and US\$21,362,000 upon an announcement by Placer Dome Inc. that commercial production has commenced. Payments will be made in cash and/or in any other form of consideration acceptable to the DRG. In addition, the Company will be required to provide funding to a Dominican non-profit organization created to support and assist the Dominican people. The Company will be required to contribute a total of US\$4,280,000 in cash and 1,300,000 common shares of the Company. The acquisition is subject to satisfactory completion of certain conditions.

4. Share Capital

Authorized - unlimited number of common shares without par value

Issued - 26,774,735 common shares

Transactions during the period are as follows:

	<u>Number of Shares</u>	<u>Amount</u>
Balance, December 31, 2003	26,758,069	\$ 7,429,779
Shares Issued:		
Share purchase warrants exercised	<u>16,666</u>	<u>9,667</u>
Balance, March 31, 2004	<u>26,774,735</u>	<u>\$ 7,439,446</u>

Share Purchase Warrants

As at March 31, 2004, the following share purchase warrants are outstanding:

<u>Exercise Price</u>	<u>Number of Shares</u>	<u>Estimated Value</u>	<u>Expiry Date</u>
\$0.20	450,000	\$45,000	Nov 4, 2004
\$0.75	416,666	\$20,833	Sept 3, 2004(i)
\$0.30	410,500	\$72,248	July 4, 2005
\$0.45/0.55	3,023,334	\$256,233	Oct 9, 2005
\$0.45/0.55	166,667	\$12,500	Oct 20, 2005
\$0.30	912,000	\$136,800	Oct 9, 2005
\$0.30	50,000	\$7,000	Oct 20, 2005
	<u>5,429,167</u>	<u>\$550,614</u>	

- (i) The expiry date of these warrants, originally March 3, 2004, has been extended to September 3, 2004. The exercise price, being \$0.75, remains unchanged.

A summary of warrants outstanding and changes during the period is presented below:

	<u>March 31, 2004</u>		<u>December 31, 2003</u>	
	<u>Number</u> <u>#</u>	<u>Weighted</u> <u>average</u> <u>exercise price</u>	<u>Number</u> <u>#</u>	<u>Weighted</u> <u>average</u> <u>exercise price</u>
Outstanding, beginning of period	5,445,833	\$0.44	----	---
Issued	----		5,445,833	\$0.44
Exercised	<u>(16,666)</u>	<u>\$0.45</u>	----	---
Outstanding, end of period	<u>5,429,167</u>	<u>\$0.44</u>	<u>5,445,833</u>	<u>\$0.44</u>

Stock Options

As at March 31, 2004, the Company had stock options issued to directors, officers and employees of the Company, outstanding as follows:

<u>Number of</u> <u>Options</u>	<u>Exercise</u> <u>Price</u>	<u>Expiry</u> <u>Date</u>
1,305,000	\$0.75	February 13, 2008
160,000	\$0.33	May 7, 2008
350,000	\$0.40	August 21, 2008
<u>600,000</u>	<u>\$0.48</u>	October 9, 2008
<u>2,415,000</u>		

5. Basic Loss per Share

Basic loss per share is computed by dividing the loss for the period by the weighted average number of common shares outstanding during the period. Diluted loss per share is calculated using the treasury method and reflects the maximum possible dilution from the potential exercise of stock options and warrants. Diluted loss per share is the same as basic loss per share since the conversion of stock options and warrants would be anti-dilutive.

6. Income Taxes

The estimated taxable income for the period is nil. Tax assets arising from differences in tax values and accounting values have been reduced by an equivalent valuation allowance. The valuation allowance will be adjusted in the period that it is determined that it is more likely than not that some portion or all of the future tax assets will be realized.

For further information on the Company's actual losses for tax purposes, refer to Note 8 of the December 31, 2003 audited consolidated financial statements. The benefit of these losses and the estimated loss for the period ended have not been recognized in these unaudited consolidated financial statements.

7. Commitment

The Company is committed to minimum amount rentals under a long-term lease for premises which expires January 31, 2006. Minimum rental commitments under the lease approximate \$141,851. Minimum rental commitments for successive years are as follows: 2004 (April – December) - \$58,030; 2005 - \$77,373; and 2006 - \$6,448.
