

**UNIGOLD INC.**

**MANAGEMENT'S DISCUSSION AND ANALYSIS AND  
UNAUDITED, CONDENSED CONSOLIDATED INTERIM OPERATING RESULTS**

For the Three Months Ended March 31, 2015 and 2014

# UNIGOLD INC.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

The following discussion and analysis of the unaudited, condensed consolidated interim operating results and financial condition of Unigold Inc. ("Unigold" or the "Company") for the fiscal periods ended March 31, 2015 and 2014 should be read in conjunction with the unaudited, condensed consolidated interim financial statements of the Company and notes thereto at March 31, 2015. All financial information in this MD&A has been prepared in accordance with International Financial Reporting Standards ("IFRS"), and all dollar amounts are expressed in Canadian dollars unless otherwise indicated. Additional information, including the Company's press releases, has been filed electronically through the System for Electronic Document Analysis and Retrieval ("SEDAR") and is available online at [www.sedar.com](http://www.sedar.com). The date of this report is May 26, 2015.

### ***Company Overview***

Unigold is a Canadian based, growth oriented, junior natural resource company focused on exploring and developing its significant land position in the Dominican Republic, within the highly prospective, Cretaceous age, Tiro Formation. The Tiro Formation, an emerging gold and base metal district, is a 75 kilometre wide series of volcanic and sedimentary rocks trending northwesterly across the island of Hispaniola. Unigold's most advanced project is their 100 percent interest in the 22,600 hectare Neita Exploration Concession, located in the west central highlands of the Dominican Republic along the border with Haiti. The license for the Concession was renewed in 2012 for another five-year term (comprised of a three-year term with two one-year extensions available upon application). The first one-year extension was granted March 2015. Unigold operates through its wholly owned Canadian subsidiary, Unigold Resources Inc., and its 97 per cent owned subsidiary, Unigold Dominicana, S.R.L., which is incorporated in the Dominican Republic.

### ***Forward-Looking Statements***

This MD&A contains "forward-looking information" within the meaning of applicable Canadian securities legislation. Forward-looking information includes, but is not limited to, information concerning Unigold's exploration program and planned gold production as well as Unigold's strategies and future prospects. Generally, forward-looking information can be identified by the use of forward-looking terminology such as "plans", "expects", or "does not expect", "is expected", "budget", "scheduled", "estimates", "forecasts", "intends", "anticipates", or "does not anticipate", or "believes" or variations of such words and phrases or statements that certain actions, events or results "may", "could", "would", "might", or "will be taken", "occur", or "be achieved". Forward-looking information is based on the opinions and estimates of management at the date the information is made, and is based on a number of assumptions and subject to a variety of risks and uncertainties and other factors that could cause actual events or results to differ materially from those projected in the forward-looking information. Assumptions upon which such forward-looking information is based include, without limitation, availability of skilled labour, equipment, and materials; the potential of the Company's properties to contain economic metals deposits; the Company's ability to meet its working capital needs for the twelve-month period ending December 31, 2015; and the plans, costs, timing and capital for future exploration and development of the Company's property interests in the Dominican Republic. Many of these assumptions are based on factors and events that are not within the control of Unigold and there is no assurance they will prove to be correct. Factors that could cause actual results to vary materially from results anticipated by such forward-looking information include changes in market conditions, variations in ore reserves, resources, grade or recovery rates, risks relating to international operations (including legislative, political, social, or economic developments in the jurisdictions in which Unigold operates), economic factors, government regulation and approvals, environmental and reclamation risks, actual results of exploration activities, fluctuating metal prices and currency exchange rates, costs, changes in project parameters, conclusions of economic evaluations, the possibility of project cost overruns or unanticipated costs and expenses, labour disputes and the availability of skilled labour, failure of plant, equipment or processes to operate as anticipated, capital expenditures and requirements for additional capital, risks associated with internal control over financial reporting, and other risks of the mining industry. Although Unigold has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors that cause actions, events or results not to be anticipated, estimated or intended. There can be no assurance that forward-looking information will prove to be accurate, as actual results and future events could differ materially from those anticipated in such information. Unigold undertakes no obligation to

update forward-looking information if circumstances or management's estimates or opinions should change except as required by applicable securities laws. The reader is cautioned not to place undue reliance on forward-looking information.

## ***Nature of Operations and Going Concern***

On November 12, 2013, the Company announced an initial inferred mineral resource estimate for the Candelones deposits of 39.5 M tonnes averaging 1.6 grams per tonne ("g/t") Au containing 2.0 M ounces of gold. The report was produced by Micon International Limited ("Micon") and followed National Instrument 43-101 guidelines. The Technical Report (which is filed on [www.sedar.com](http://www.sedar.com)) was prepared assuming exploitation of the resources as an open-pit.

On February 24, 2015 the Company announced an updated resource estimate focusing on the high-grade mineralization zones at the Candelones Extension of 5.3 M tonnes averaging 5.27 g/t Au containing 894,000 ozs Au. The updated mineral resource estimate (which was filed on [www.sedar.com](http://www.sedar.com) April 8, 2015) was also prepared by Micon following NI 43-101 guidelines. This updated estimated considers underground exploitation of the Candelones Extension deposit, focusing on high grade gold/copper mineralization that occurs as multiple, flat lying to moderately south dipping, sub-parallel lenses, ranging from 3.0 to 6.0 metres in thickness. The high grade lenses lie within the larger mineralized envelope of lower grade gold / copper mineralization that was the focal point of the initial mineral resource estimate for the Candelones Project that was reported in November, 2013.

The reader is cautioned that mineral resources are not mineral reserves and do not have demonstrated economic viability. However, by definition, mineral resources demonstrate "reasonable prospects for economic extraction". The recoverability of the amounts shown for mineral properties and deferred exploration and evaluation costs are dependent upon the existence of economically recoverable mineral reserves, the ability of the Company to obtain the necessary financing to complete its exploration programs and upon future profitable production or proceeds from disposition of such properties.

Because of limited working capital and continuing operating losses, the Company's continuance as a going concern is dependent upon its ability to obtain adequate financing and to reach profitable levels of operation. It is not possible to predict whether financing efforts will be successful or if the Company will attain profitable levels of operations or be able to sell properties.

## ***Highlights for Q1 2015***

### ***Operations***

- Updated NI 43-101 resource estimate - 5.3 M tonnes averaging 5.27 g/t Au containing 894,000 ozs Au.
- Exploration license one year extension approved.

### ***Other***

- Joseph Del Campo appointed interim President and CEO.
- Shareholders approved share consolidation of up to 10-for-one at discretion of the Board.

## ***Exploration***

### ***Neita***

Unigold's Neita concession covers a 22,616 ha area within the highly prospective Tireo Formation, a 75 kilometre wide series of volcanic and sedimentary rocks trending northwesterly through the island of Hispaniola. The Tireo Formation hosts a number of promising gold and base metal targets, both in the Dominican Republic and Haiti. Over 5.0 million ounces of gold equivalent resources have been identified in the Tireo Formation in the past year.

In 2015, Unigold announced an updated, NI 43-101 inferred mineral resource of 5.3 M tonnes averaging 5.27 g/t Au containing 894,000 ozs Au and 0.35 % Copper ("Cu") containing 41,175,000 lbs Cu at the Candelones Extension deposit, within the Neita Concession. The updated mineral resource estimate represents a first step in the evaluation of the viability of a small to mid-sized underground mine and mill complex at the Candelones Extension deposit where initial drilling has identified higher grade lenses of gold and copper mineralization within the larger, lower grade, near surface resource established in November, 2013. The Company believes that should the economic and technical viability be established underground development offers significant advantages to the initial near surface

development model; specifically in terms of a smaller environmental footprint, reduced capital costs, reduced permitting complexity and a reduced development timeline resulting in improved project economics. Candelones falls within the main gold trend, a series of significant soil anomalies defining the southern boundary of the Concession. The updated mineral resource was estimated by Mr. W. Lewis, P.Geo. and Mr. A. San Martin, MAusIMM (CP) of Micon International Limited, a Toronto based consulting company, independent of Unigold. Mr. Lewis and Mr. San Martin meet the requirements of a “qualified person” as established by the Canadian Institute of Mining, Metallurgy and Petroleum (CIM) Definition Standards for Mineral Resources and Mineral Reserves (May, 2014) (“the CIM Standards”). The estimate is based on a long term gold price of US\$ 1,200 per ounce, a long term copper price of \$3.00 per pound and an economic cut-off grade of 3.50 g/t gold.

The property was placed on a care and maintenance basis at year-end 2014 to conserve cash. In the second quarter of 2015 Unigold plans to focus on marketing the updated mineral resource estimate and the concept of an underground mine and mill complex exploiting the Candelones Extension deposit. The Company is planning a limited exploration program in the second half of 2015 comprising a limited, infill diamond drill program. The timing and scope of this exploration work shall be totally reliant on Unigold being able to successfully attract capital or a joint venture partner.

The exploration license for the Neita concession was extended for one additional year in March 2015.

Completed work:

Compilation data	Statistics		
	Q1 2015	YTD	PROJECT TO DATE
Drilling – holes	–	–	448
Drilling – metres	–	–	103,389
Trenching – metres	–	–	31,559
Geochemical analysis	–	–	142,697
Grab samples	–	–	10,108
Soil samples	–	–	32,704
Stream samples	–	–	884
Induced polarization lines – km	–	–	196
Magnetic survey lines – km	–	–	687

The material categories of exploration and evaluation assets are summarized below:

	As at	January 1, 2015	Year to date additions	Year to date disposals	March 31, 2015
Consulting (contract geologists and other technical specialists)		\$ 6,158,918	\$ 13,151	\$ –	\$ 6,172,069
Drilling (including supplies and logistics expenses)		12,927,832	–		12,927,832
Field expense (including geochemistry and geophysics)		2,210,875	–		2,210,875
Laboratory analysis		4,430,095	–		4,430,095
Travel		1,528,613	6,054		1,534,667
Wages & salaries		3,794,519	110,646		3,905,165
Other (includes legal costs, capitalized depreciation)		5,338,826	102,023	(23,443)	5,417,406
		\$ 36,389,678	\$ 231,874	\$ (23,443)	\$ 36,598,109

### *Los Guandules*

In January 2013, Unigold entered into an agreement with Malbex Resources Inc. to transfer its interest in the Los Guandules prospect. The transaction was conditional on the grant of an exploration licence to Malbex by the Dominican Republic Ministry of Mines. Malbex was advised in March 2015 that the license would not be granted and, as a result, the agreement was terminated.

### *El Carrizal*

In January 2013, Unigold entered into an agreement with Terreno Resources Corp. to sell its option to acquire 100% of the El Carrizal Concession. The closing of the transaction contemplated by the Agreement remains subject to the final approval of the TSX Venture Exchange and the shareholders of Terreno. The transaction has not closed as both

parties are waiting approval of the El Carrizal exploration licence from the Dominican Republic Ministry of Mines. At the time of the transaction Terreno was considered a non-arm's length party of Unigold as a result of the fact an investor held more than 10% of each company. The agreement has been extended to July 31, 2015.

## **Executive Changes**

Andrew Cheatle resigned as President and Chief Executive Officer, and as a Director effective January 31, 2015.

Director Joseph Del Campo has accepted the role of Interim President and CEO effective February 1, 2015. Mr. Del Campo has played a leadership role at Unigold Inc. since 2004 as former Chief Financial Officer, as a Director and as Chair of the Audit Committee. Mr. Del Campo holds Chartered Professional Accountant (CPA) and Certified Management Accountant (CMA) designations. He began his career with Falconbridge Limited and spent over 19 years working within the Falconbridge group of companies at progressive financial positions, including Controller and Treasurer of Falconbridge Dominicana, a ferronickel operation in the Dominican Republic; and Falconbridge Gold Corporation, a gold mining company with operating mines in Africa and Timmins, Ontario. Over the past 20 years, Mr. Del Campo has been a Director and Vice President, Finance and Chief Financial Officer of a number of junior exploration companies listed on the TSX and TSX Venture Exchanges.

## **Results of Operations**

For the quarter ended March 31, 2015, the Company recorded a loss of \$216,715, or \$0.00 per share, compared with a loss of \$391,671 or \$0.00 per share, in 2014.

The material components of general and administrative expenses are detailed below.

	Three Months Ending March 31, <b>2015</b>	2014
Rent	<b>\$ 12,465</b>	\$ 12,465
Insurance	<b>6,888</b>	10,247
Computer supplies and support	<b>5,238</b>	13,578
Other	<b>4,906</b>	22,878
<b>Total</b>	<b>\$ 29,497</b>	<b>\$ 59,168</b>

## **Liquidity and Capital Resources**

The Company has no producing properties and, consequently, has no current operating income or cash flow. Financing of the Company's activities to date has been primarily obtained from equity issues. The continuing development of the Company's properties therefore depends on the Company's ability to obtain additional financing.

Market appetite for investing in resource stocks is at a very low level. The price of gold declined significantly over the last 2 1/4 years, from U.S. \$1,664 per ounce at December 31, 2012 to U.S. \$1,187 at March 31, 2015. Most resource companies have seen significant stock price erosion. M&A activities and financing activities are at extremely low levels. Globally, resource nationalism has made investors wary. Many major projects have been deferred or cancelled. There has been a continuing sell-off at the junior end of the market that is starving junior exploration companies of capital. Investors are looking for low-risk, near-term, high yield opportunities that the junior mining sector cannot currently provide. The Company may not be able to raise capital in these markets or, if financing is possible, it may be fairly small to limit dilution. The shareholders approved a resolution at the 2015 Annual General and Special Meeting allowing the Board of Directors to undertake a share consolidation of up to 10-to-one if such a consolidation is required as part of a financial transaction.

The Company is exploring other financing activities including joint ventures, merger/acquisition transaction and asset sales. In the first quarter the Company received \$48,018 from the sale of unused vehicles.

Based on the 2015 'austerity budget', Unigold will use all its available cash on corporate sustaining activities by the end of the year unless additional financing is received.

As at March 31, 2015, the Company had cash balances of \$312,418 (December 31, 2014 – \$638,850) and working capital of \$295,650 (December 31, 2014– \$644,245).

On March 31, 2015, the shareholders of the Company approved a resolution to consolidate the issued and outstanding common shares of the Corporation on the basis of one “new” share for up to every ten “old” shares, with the effective date of the share consolidation and the final ratio of the share consolidation to be determined by the directors of the Company. The Consolidation will only be implemented, if at all, upon a determination by the Board of Directors that the Consolidation is in the best interests of the Company and its shareholders at that time.

## **Outlook**

Unigold has limited cash available at March 31, 2015. Given the present challenging market conditions, the Company has moved to conserve its cash. Operations in the Dominican Republic have been placed on a care and maintenance basis and the administration office moved to smaller quarters. Executive management employment contracts were restructured at the end of 2014 and senior staff will work for Unigold in 2015 as consultants on an “as-needed basis” on essential activities such as addressing working capital needs and statutory financial reporting and governance.

Exploration or in-fill drilling (Candelones) will not resume in 2015 unless additional financing is available or a transaction is completed. Unigold forecasts to end the 2015 year with a working capital deficit if no financing is received.

## **Quarterly Financial Information (Unaudited)**

The following table sets out selected financial information derived from the Company’s consolidated financial statements for each of the eight most recently completed quarters:

<i>(\$ thousands, except per share amounts)</i>	2015	2014				2013		
	Q1	Q4	Q3	Q2	Q1	Q4	Q3	Q2
Revenue	–	–	–	–	–	–	–	–
Net loss	(217)	(696)	(262)	(739)	(392)	(726)	(392)	(455)
Net loss per share: Basic and diluted	(0.00)	(0.00)	(0.00)	(0.01)	(0.00)	(0.01)	(0.00)	(0.00)
Acquisition of exploration and evaluation assets	(204)	547	809	519	507	1,029	1,515	2,290

The net loss in the fourth quarter of 2014 included cash contract restructuring payments of \$430,459. The second quarter net loss in 2014 included a non-cash write-off of exploration properties which increased the loss by \$445,283. In Q4 2013, \$215,000 of accrued expenses relating to the disposal of exploration property were written off due to delays in finalizing the deal.

## **Related Party Transactions**

Included in the accounts for the periods ended March 31, 2015 and 2014 are payments made to officers, directors and corporations under the control or significant influence of officers and directors of the Company as follows:

	Three months ended March 31,	
	2015	2014
Management services fees paid to corporations controlled by or under significant influence of an officer of the Company: Wes Hanson	\$ 8,000	\$ 40,500
Professional fees paid to an officer: Joseph Del Campo	18,750	–
Professional fees paid to an officer: John Green	42,325	–
Professional fees paid to a former officer: Andrew Cheatle	10,374	–
	<b>\$ 79,449</b>	<b>\$ 40,500</b>

These transactions were in the normal course of operations and were measured at the exchange amount which is the amount of consideration established and agreed to by the related parties. These transactions were in the normal course of operations and were measured at the exchange amount which is the amount of consideration established and agreed to by the related parties.

### ***Commitments, Contingencies and Contractual Obligations***

The Company's exploration activities are subject to various federal, provincial and international laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company conducts its operations so as to protect public health and the environment and believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

Minimum contractual payments over the next five years are as follows:

Year	Total	2014	2015	2016	2017	2018
Office lease	\$ 42,000	\$ 42,000	\$ –	\$ –	\$ –	\$ –
Services	112,000	106,000	6,000	–	–	–
	<b>\$ 154,000</b>	<b>\$ 148,000</b>	<b>\$ 6,000</b>	<b>\$ –</b>	<b>\$ –</b>	<b>\$ –</b>

### ***Trend Information***

There are no major trends that are anticipated to have a material effect on the Company's financial condition and results of operations in the near future.

### ***Off-Balance Sheet Arrangements***

The Company has no off-balance sheet arrangements, no capital lease agreements and no long-term debt obligations.

### ***Proposed Transactions***

There are no proposed transactions that will materially affect the performance of the Company. As is typical of the gold exploration sector, Unigold is continually reviewing potential property acquisition, investment and joint venture transactions and opportunities

### ***Critical Accounting Policies and Estimates***

The Company prepares its consolidated financial statements in accordance with IFRS. The most significant accounting estimates are the policy of capitalizing exploration costs on its properties and the valuation of such properties; and the stock-based compensation calculation.

The Company reviews its portfolio of exploration properties on an annual basis to determine whether a write-down of the capitalized cost of any property is required. The recoverability of the amounts shown for exploration

properties and deferred exploration and evaluation assets is dependent on the existence of economically recoverable reserves, and the ability to obtain financing to complete the development of such reserves.

The Company uses the Black-Scholes model to determine the fair value of options and warrants. The main factor affecting the estimates of stock-based compensation is the stock price volatility used. The Company uses the historical price data and comparables in the estimate of future volatilities.

### ***Risks and Uncertainties***

At the present time, Unigold does not hold any interest in a mining property in production. The Company's viability and potential successes lie in its ability to develop, exploit and generate revenue out of mineral deposits. Revenues, profitability and cash flow from any future mining operations involving the Company will be influenced by precious and/or base metal prices and by the relationship of such prices to production costs. Such prices have fluctuated widely and are affected by numerous factors beyond the Company's control.

#### ***Liquidity and Capital Market Risk***

The Company has limited financial resources and there is no assurance that additional funding will be available to it for further exploration and development of its projects or to fulfill its obligations under applicable agreements. Although Unigold has been successful in the past in obtaining financing through the sale of equity securities, there can be no assurance that the Company will be able to obtain adequate financing in the future or that the terms of such financing will be favourable. Failure to obtain such additional financing could result in delay or indefinite postponement of further exploration and development of the property interests of the Company with the possible dilution or loss of such interests.

#### ***Nature of Mineral Exploration and Development Projects***

Mineral exploration is highly speculative in nature, involves many risks and frequently is non-productive. There is no assurance that exploration efforts will be successful. The exploration and development of mineral deposits involves significant financial and other risks over an extended period of time, which even a combination of careful evaluation, experience, and knowledge may not eliminate. Few mining properties that are explored are ultimately developed into producing mines. Major expenses are required to establish reserves by drilling and to construct mining and processing facilities. Large amounts of capital are frequently required to purchase necessary equipment. It is impossible to ensure that the current or proposed exploration programs on properties in which the Company has an interest will result in profitable commercial mining operations.

Success in establishing mineral reserves through exploration is the result of a number of factors, including the quality of management, the Company's level of geological and technical expertise, the quality of land available for exploration and other factors. Once mineralization is discovered, it may take several years in the initial phases of drilling until production is possible, during which time the economic feasibility of production may change. Substantial expenditures are required to establish proven and probable reserves through drilling, to determine the optimal metallurgical process to extract the metals from the ore and, in the case of new properties, to construct mining and processing facilities. Whether a deposit will be commercially viable depends on a number of factors, including the particular attributes of the deposit, such as its size and grade, costs and efficiencies of the recovery methods that can be employed, proximity to infrastructure, financing costs and governmental regulations, including regulations relating to prices, taxes, royalties, infrastructure, land use, importing and exporting of gold or silver, and environmental protection. The effect of these factors cannot be accurately predicted, but the combination of these factors may result in the Company not receiving an adequate return on its invested capital. Because of these uncertainties, no assurance can be given that exploration programmes will result in the establishment or expansion of resources or reserves.

#### ***The Corporation's Properties Are Subject to Title Risks***

The Company has taken all reasonable steps to ensure that it has proper title to its properties. However, the Company cannot provide any guarantees that there are no prior unregistered agreements, claims or defects that may result in the Company's title to its properties being challenged. A successful challenge to the precise area and location of these claims could result in the Company being unable to operate on its properties as anticipated or being unable to enforce its rights with respect to its properties which could have a material and adverse effect on the Company's future cash flows, earnings, results of operations and financial condition.

### ***The Company and Its Projects Are Subject to Risks of Operating in Foreign Countries***

The Company's projects are subject to the risks of operating in foreign countries. The Company's foreign operations and investments and its ability to carry on its business in the normal course may be adversely affected by political and economic considerations such as civil unrest, war (including in neighbouring states), terrorist actions, labour disputes, corruption, sovereign risk, political instability, the failure of foreign parties, courts or governments to honour or enforce contractual relations, changing government regulations with respect to mining (including environmental requirements, taxation, land tenure, foreign investments, income repatriation and capital recovery), fluctuations in currency exchange and inflation rates, import and export restrictions, challenges to the Company's title to properties or mineral rights, problems renewing licenses and permits, opposition to mining from environmental or other non-governmental organizations, increased financing costs, instability due to economic under-development, inadequate infrastructure, and the expropriation of property interests. In addition, the enforcement by Unigold of its legal rights to exploit its properties or to utilize its permits and licenses may not be recognized by the court systems in the Dominican Republic. The occurrence of one or more of these risks could have a material and adverse effect on the viability and financial performance of its foreign operations, which could have a material and adverse effect on the Company's future cash flows, earnings, results of operations and financial condition. Any of these events could also result in conditions that delay or prevent the Company from exploring or developing its properties even if economic quantities of minerals are found.

### ***Financing Risk***

To fund future investments in its mineral properties the Company requires capital. The Company may not have sufficient internally generated cash flow and working capital and may have to access the capital markets. Subject to economic conditions at the time, there can be no assurance the Company would be able to raise additional debt or equity financing on acceptable terms. If the Company cannot finance its future projects it could have a material and adverse effect on the Company's future cash flows, earnings, results of operations and financial condition.

### ***Environmental Matters***

In the risks section above, reference was made to several risks impacting on environment matters. Unigold believes that it is in compliance with all environmental regulations in the Dominican Republic and has made no provision for environmental remediation costs as such costs are believed to be immaterial.

### ***Corporate Social Responsibility ("CSR"), Safety, Health and Environment.***

The Company engages in and adheres to the principles of sound Corporate Social Responsibility with the local communities and people where it operates. While the company recognizes that the funds to achieve these goals are derived from shareholders investment in the company, it also believes that those same shareholders recognize that pragmatic and cost effective CSR activity benefits all stakeholders and enables ongoing field activity with the support of local leaders, government, landowners and the community in general.

There were no lost time accidents during the period. There were no reportable environmental compliance events during the period.

The Company has retained AMEC Consulting to develop its management systems policies. The management system policies include designing and implementing a surface water participatory monitoring program that will identify existing water quality and quantity conditions in the exploration impact areas, communicating these to the local population and to serve as a baseline for the future ESIA. The Company is also developing a Human Resource Policy and Employee Grievance Mechanism, a Security Policy and Procedure, Land Acquisition and Compensation for Exploration and completing a Rapid Biodiversity Assessment.

### ***Future Accounting Changes***

#### ***Accounting standards and interpretations issued but not yet adopted***

Certain new standards, interpretations, amendments and improvements to existing standards are not yet effective for the period ended March 31, 2015, and have not been applied in preparing these unaudited, condensed consolidated interim financial statements as follows:

- IFRS 9, *Financial Instruments*, addresses the classification and measurement of financial assets;

These standards are being evaluated to determine their impact on the unaudited, condensed consolidated interim financial statements of the Company. IFRS 9 is effective for the Company's fiscal year starting January 1, 2018.

## ***Financial Instruments***

### ***Fair Value***

IFRS requires that the Company disclose information about the fair value of its financial assets and liabilities. The carrying amounts for cash and cash equivalents, sundry receivables, accounts payable and accrued liabilities on the Statements of Financial Position approximate fair value because of the limited term of these instruments.

Fair value estimates are made at the statement of financial position date based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties in significant matters of judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect these estimates.

### ***Credit Risk***

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash, other receivables, other financial assets and other investments. Cash is held with reputable Canadian financial institutions, from which management believes the risk of loss to be minimal. Financial instruments included in other receivables consist of harmonized sales tax due from the Federal Government of Canada. Other receivables are in good standing as of March 31, 2015. Management believes that the credit risk concentration with respect to financial instruments included in other receivables is minimal.

### ***Liquidity Risk***

As of March 31, 2015, the Company has a cash balance of \$312,418 (December 31, 2014– \$638,850) to settle current accounts payable and accrued liabilities of \$58,145 (2014 – \$49,230). The Company's other current assets consist of other receivables of \$18,281 (December 31, 2014 – \$17,302) and other financial assets and prepaids of \$23,096 (December 31, 2014 – \$37,323).

### ***Market Risk***

At the present time, the Company does not hold any interest in a mining property that is in production. The Company's viability and potential success depends on its ability to develop, exploit, and generate revenue from the development of mineral deposits. Revenue, cash flow, and profits from any future mining operations in which the Company is involved will be influenced by precious and/or base metal prices and by the relationship of such prices to production costs. Such prices can fluctuate widely and are affected by numerous factors beyond the Company's control.

### ***Foreign Exchange Risk***

The Company's financings are in Canadian dollars. Certain of the Company's transactions with its subsidiary, Unigold Dominicana, S.R.L. are incurred in foreign currencies and are therefore subject to gains or losses due to fluctuations in exchange rates. The Company is therefore subject to foreign exchange risk. As at March 31, 2015, the Company had cash balances of \$34,844 (December 31, 2014 – \$44,877) in United States dollars. U.S. \$ accounts payable as at March 31, 2015 were U.S. \$2,900 (December 31, 2014 – U.S. \$nil).

### ***Interest Rate Risk***

The Company's current policy is to invest excess cash in investment-grade short-term deposit certificates issued by its financial institutions. The Company periodically monitors the investments it makes and is satisfied with the creditworthiness of its financial institutions. As of March 31, 2015, interest rate risk is minimal since the Company has no interest-bearing debt instruments.

### ***Commodity Price Risk***

The ability of the Company to develop its properties and the future profitability of the Company is directly related to the market price of certain minerals.

### ***Sensitivity Analysis***

The Company is exposed to foreign currency risk of fluctuations on financial instruments that are denominated in U.S. dollars and the Dominican Republic Peso related to cash balances, other investments and accounts payable. Sensitivity to a plus or minus 5% change in the foreign exchange rate would not have resulted in a significant fluctuation in loss for the period ended March 31, 2015. The Company does not undertake currency hedging activities to mitigate its foreign currency risk.

### ***Capital Management***

Unigold considers its capital structure to consist of total equity attributable to equity holders of the Company. The Company manages its capital structure and makes adjustments to it, in order to have the funds available to support its exploration and corporate activities. The Company's objective in managing capital is to safeguard its ability to operate as a going concern. The Company is in the development stage and as such is dependent on external financing. In order to carry out planned exploration and development, and pay for administrative and operating costs, the Company will spend its existing working capital. The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of its exploration properties and maximize shareholder returns. The Company satisfies its capital requirements through careful management of its cash resources and by equity issues, as necessary, based on the prevalent economic conditions of both the industry and the capital markets and the underlying risk characteristics of the related assets. Management reviews its capital management approach on an ongoing basis. The Company is not subject to externally imposed capital requirements.

### ***Report on Internal Control over Financial Reporting and Disclosure Controls and Procedures***

In connection with Exemption Orders issued in November 2007 by each of the British Columbia Securities Commission and Ontario Securities Commission, the Chief Executive Officer and Chief Financial Officer of the Company have filed a Venture Issuer Basic Certificate with respect to the financial information contained in the unaudited, condensed consolidated interim financial statements and the accompanying related MD&A. In contrast to the certificate under National Instrument 52-109 (Certification of Disclosure in Issuer's Annual and Interim Filings) ("NI 52-109"), the Venture Issuer Basic Certificate does not include representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in NI 52-109. For further information the reader should refer to the Venture Issuer Basic Certificates filed by the Company with the Annual Filings on SEDAR at [www.sedar.com](http://www.sedar.com). Management believes that based upon the evaluations and actions taken to date, reasonable assurance can be provided that there is no material misstatement of the financial results reported as of March 31, 2015.

### ***Outstanding Share Data***

Details about the Company's outstanding common shares as at May 26, 2015 are as follows:

Common shares issued and outstanding	243,713,238
Potential issuance of common shares – warrants	25,425,000
Stock options issued to directors, employees, officers and consultants	12,175,000

### ***Qualified Person***

The foregoing scientific and technical information has been prepared or reviewed by Wes Hanson, P.Geo., the Chief Operating Officer of the Company. He also supervises all work associated with the Company's exploration programs in the Dominican Republic. Mr. Hanson is a "qualified person" within the meaning of National Instrument 43-101. W. Lewis P. Geo. And A. San Martin MAusIMM(CP), both employed by Micon have reviewed and approved statements associated with the mineral resource estimates.

*The accompanying unaudited condensed interim financial statements of Unigold Inc. have been prepared by and are the responsibility of management. The unaudited condensed interim financial statements have not been reviewed by Unigold's auditors.*

## **NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

*For the periods ended March 31, 2015 and 2014*

Unaudited-Expressed in Canadian dollars unless otherwise stated.

### **1. Nature of Operations and Basis of Presentation**

#### ***Nature of operations***

Unigold Inc. (“Unigold” or the “Company”) was incorporated pursuant to the Business Corporations Act (Ontario) on May 9, 1990. The Company’s executive office is located at 44 Victoria Street, Suite 504, Toronto, Ontario M5C 1Y2.

Unigold is in the process of exploring its property in the Dominican Republic.

#### ***Basis of presentation***

These consolidated financial statements include the accounts of the Company, and its wholly owned subsidiary, Unigold Resources Inc., which is incorporated in Canada under the Canada Business Corporations Act, and its 96.7% owned subsidiary, Unigold Dominicana, S.R.L., which is incorporated in the Dominican Republic. All material intercompany balances and transactions have been eliminated.

### **2. Going Concern**

These condensed consolidated interim financial statements have been prepared on a going concern basis. The going concern basis of presentation assumes that the Company will continue in operation for the foreseeable future and be able to realize its assets and discharge its liabilities and commitments in the normal course of business. Because of continuing operating losses, the Company's continuance as a going concern is dependent upon its ability to obtain adequate financing or to reach profitable levels of operation. Management feels that there is a material uncertainty, which causes significant doubt about the Company’s ability to continue as a going concern. To address its financing requirements, the Company will seek financing through measures that may include joint venture agreements, debt and equity financings, asset sales, and rights offerings to existing shareholders.

It is not possible to predict whether financing efforts will be successful or if Unigold will attain profitable levels of operation. These condensed consolidated interim financial statements do not include any adjustments to the carrying values of assets and liabilities and the reported expenses and statement of financial position classification that would be necessary should the Company be unable to continue as a going concern and therefore be required to realize its assets and liquidate its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying consolidated financial statements. These adjustments could be material.

### **3. Measurement Uncertainty**

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of exploration properties and exploration and evaluation assets, and the Company’s continued existence is dependent upon the preservation of its interest in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise alternative financing, if necessary, or alternatively upon the Company’s ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values. All of the Company’s exploration properties are located outside of Canada and are subject to the risk of foreign investment, including increases in taxes and royalties, renegotiation of contracts, currency exchange fluctuations and political uncertainty.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current state of exploration of such properties, these procedures do not guarantee the Company’s title. Property title may be subject to unregistered prior agreements and non-compliance with regulatory and environmental requirements.

## **NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

*For the periods ended March 31, 2015 and 2014*

Unaudited-Expressed in Canadian dollars unless otherwise stated.

### **4. Summary of Significant Accounting Policies**

#### **(a) Statement of compliance**

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard (“IAS”) 34 *Interim Financial Reporting* using the accounting policies consistent with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board. These condensed consolidated interim financial statements have been prepared on the basis of and using accounting policies, methods of computation and presentation consistent with those applied in Unigold’s 2014 Consolidated Annual Financial Statements. The accounting policies applied in these condensed consolidated interim financial statements are based on IFRS issued and outstanding as of May 20, 2015, the date the Audit Committee approved these statements. Any subsequent changes to IFRS that are given effect in the Company’s annual consolidated financial statements for the year ending December 31, 2014 could result in restatement of these condensed consolidated interim financial statements, including the transition adjustments recognized on change-over to IFRS.

The preparation of financial statements in accordance with IAS 34 requires the use of certain critical accounting estimates. It also requires management to exercise judgement in applying the Company’s accounting policies. See *Note 5*.

#### **(b) Basis of preparation**

The condensed consolidated interim financial statements are presented in Canadian dollars. The financial statements are prepared on the historical cost basis. In addition, these financial statements are prepared using the accrual basis of accounting except for cash flow information.

#### **(c) Accounting standards and interpretations issued but not yet adopted**

Certain pronouncements were issued by the IASB or the IFRIC that are mandatory for accounting periods on or after January 1, 2015 or later periods. Many are not applicable or do not have a significant impact to the Company and have been excluded. The following have not yet been adopted and are being evaluated to determine their impact on the Company.

IFRS 9 – Financial Instruments (“IFRS 9”) was issued by the IASB in November 2009 with additions in October 2010 and May 2013 and will replace IAS 39 Financial Instruments: Recognition and Measurement (“IAS 39”). IFRS 9 uses a single approach to determine whether a financial asset is measured at amortized cost or fair value, replacing the multiple rules in IAS 39. The approach in IFRS 9 is based on how an entity manages its financial instruments in the context of its business model and the contractual cash flow characteristics of the financial assets. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward unchanged to IFRS 9, except that an entity choosing to measure a financial liability at fair value will present the portion of any change in its fair value due to changes in the entity’s own credit risk in other comprehensive income, rather than within profit or loss. The new standard also requires a single impairment method to be used, replacing the multiple impairment methods in IAS 39. IFRS 9 is effective for annual periods beginning on or after January 1, 2018. Earlier adoption is permitted.

IFRS 10 – Consolidated Financial Statements (“IFRS 10”) and IAS 28 – Investments in Associates and Joint Ventures (“IAS 28”) were amended in September 2014 to address a conflict between the requirements of IAS 28 and IFRS 10 and clarify that in a transaction involving an associate or joint venture, the extent of gain or loss recognition depends on whether the assets sold or contributed constitute a business. The amendments are effective for annual periods beginning on or after January 1, 2016. Earlier adoption permitted.

## **NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

*For the periods ended March 31, 2015 and 2014*

Unaudited-Expressed in Canadian dollars unless otherwise stated.

IFRS 13 – Fair Value Measurement (“IFRS 13”) was amended to clarify that the exception which allows fair value measurements of a group of financial assets and liabilities on a net basis applies to all contracts within the scope of IAS 39 or IFRS 9, regardless of whether they meet the definitions of financial assets or liabilities as defined in IAS 32. The amendment is effective for annual periods beginning on or after July 1, 2014.

IAS 1 – Presentation of Financial Statements (“IAS 1”) was amended in December 2014 in order to clarify, among other things, that information should not be obscured by aggregating or by providing immaterial information, that materiality consideration apply to all parts of the financial statements and that even when a standard requires a specific disclosure, materiality considerations do apply. The amendments are effective for annual periods beginning on or after January 1, 2016. Earlier adoption permitted.

IAS 24 – Related Party Disclosures (“IAS 24”) was amended to clarify that an entity providing key management services to the reporting entity or the parent of the reporting entity is a related party of the reporting entity. The amendments also require an entity to disclose amounts incurred for key management personnel services provided by a separate management entity. The amendments to IAS 24 are effective for annual periods beginning on or after July 1, 2014.

These standards are being evaluated to determine their impact on the consolidated financial statements of the Company. IFRS 9 is effective for the Company’s fiscal year starting January 1, 2018.

### **(d) Accounting policies**

The accounting policies applied by the Company in these condensed consolidated interim financial statements are the same as those applied to the Company’s annual consolidated financial statements for the year ended December 31, 2014 and the corresponding interim reporting period. *Note 4* to those annual statements describes the significant accounting policies used by the Company. These interim financial statements do not include all the notes of the type normally included in an annual financial report and therefore should be read in conjunction with the Company’s annual financial statements for the year ended December 31, 2014, as they provide an update of previously reported information.

## **5. Significant Accounting Judgments and Estimates**

The preparation of these condensed consolidated interim financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. Actual outcomes could differ from these estimates. The condensed consolidated interim financial statements include estimates which, by their nature, are uncertain. The impacts of such estimates are pervasive throughout the consolidated financial statements, and may require accounting adjustments based on future occurrences. Revisions to accounting estimates are recognized in the period in which the estimate is revised and the revision affects both current and future periods.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the statement of financial position date, that could result in a material adjustment to the carrying amounts of assets and liabilities, in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- i. the recoverability of exploration properties and exploration and evaluation assets which are included in the condensed consolidated interim statement of financial position;
- ii. the inputs used in accounting for valuation of warrants and options which are included in the condensed consolidated interim statement of financial position;
- iii. the inputs used in accounting for share-based compensation expense in the condensed consolidated interim statement of comprehensive loss;

**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

For the periods ended March 31, 2015 and 2014

Unaudited-Expressed in Canadian dollars unless otherwise stated.

- iv. the nil provision for asset retirement obligations which is included in the condensed consolidated interim statement of financial position;
- v. the estimated useful life of property, plant and equipment; and
- vi. the existence and estimated amount of contingencies (*Note 16*).

**6. Property, Plant and Equipment**

Vehicles, field equipment and camp and buildings relate to the Company's exploration activities. During the three month period ended March 31, \$49,039 (2014 – \$51,570) of amortization was capitalized to exploration and evaluation assets.

Cost	Land	Office furniture and equipment	Computer equipment	Vehicles	Field equipment	Camp and buildings	Total

**Neita**

The Company owns 100% of the exploration rights for gold, silver, copper, zinc and all associated minerals on the Neita Property in the north western Dominican Republic, as well as a sole and exclusive option for the commercial mining of the mineral deposits. In March 2012, Unigold's license was renewed until March 2015 with option for two 1-year renewals. In March 2015 the first 1-year renewal was granted. During the period ended March 31, 2015, \$49,039 (2014 – \$50,469) of amortization was capitalized to exploration and evaluation assets and \$nil (2014 – \$73,184) of non-cash share-based expense was capitalized to exploration and evaluation assets.

**Los Guandules**

On February 16, 2004, the Company entered into a definitive agreement with Americana de Explotaciones Mineras, S.R.L. ("Americana"), a Dominican private company, and the shareholders thereof, relating to the acquisition by the Company of the Los Guandules concession in the Dominican Republic. Since Unigold has no further interest in the prospect, in 2014 a provision of \$340,827 was made against the carrying value of the asset.

In the first quarter of 2013, Unigold entered into an agreement with Malbex Resources Inc. ("Malbex") whereby Unigold has provided its consent to the acquisition of Americana by Malbex and the termination of the Unigold's option agreement with Americana. The acquisition was conditional on the issuance to Americana of the concession agreement in respect of the property. In March 2015 the Dominican Government denied the application and the agreement expired March 31, 2015.

**El Carrizal**

On May 30, 2011, the Company entered into a definitive agreement relating to the acquisition by the Company of an option to acquire the El Carrizal Concession for \$114,456 (U.S. \$120,000) and 400,000 common shares of the Company (issued and valued at \$40,000). The option is exercisable at any time until May 30, 2017 for U.S. \$100.

In the first quarter of 2013, Unigold entered into an agreement (the "Agreement") with Terreno Resources Corp. ("Terreno") to sell its option to acquire 100% of the El Carrizal concession. The agreement was amended June 4, 2013. As consideration for the purchase of the option, Terreno will issue to Unigold a total of 11,500,000 common shares in the capital of Terreno (the "Terreno Shares") and make cash payments totaling \$1,000,000. An initial \$50,000 cash payment was received in the first quarter of 2013. Terreno will issue 5,750,000 common shares on exercise of the option and registration with the relevant authorities in the Dominican Republic. An additional issue of 5,750,000 common shares of Terreno to Unigold will occur as soon as practicable after such time as such issuance will not result in Unigold holding more than 10% of Terreno's common shares outstanding. A further cash payment of \$250,000 is due within twelve months of the exercise of the option by Terreno. Two further cash payments of \$350,000 will be due within the 24 and 36 month anniversaries of the date Terreno exercises the option. In addition, Unigold will be granted a 2% net smelter returns royalty, of which half (leaving Unigold with a royalty equal to 1% of net smelter returns) can be repurchased by Terreno for US\$1,000,000. Unigold will be entitled to receive an additional 5,000,000 common shares of Terreno in the event that 2,000,000 ounces of gold are delineated on the property by Terreno on a National Instrument 43-101 compliant basis, in any category of resource. All such

**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS***For the periods ended March 31, 2015 and 2014*

Unaudited-Expressed in Canadian dollars unless otherwise stated.

common shares of Terreno which may be issued to Unigold pursuant to the Agreement will be subject to a hold period which will run for a period of four months from the time of the issue of such common shares.

The closing of the transaction contemplated by the Agreement remains subject to the final approval of the TSX Venture Exchange and the shareholders of Terreno. The Agreement has been extended to July 31, 2015, due to regulatory delays in the Dominican Republic obtaining the exploration concession. Terreno was considered a non-arm's length party of Unigold as a result of the fact an investor held more than 10% of each company. As there is uncertainty over when the transaction might close, the value which might be received and since Unigold has no further interest in the prospect, in 2014 a provision of \$104,456 was made against the carrying value of the asset.

**8. Equity Attributable to Equity Holders of the Company****(a) Common shares***Authorized, issued and outstanding shares*

Common shares, no par value, authorized unlimited number of shares, issued and outstanding were 243,713,238 shares as at March 31, 2015 (December 31, 2014 – 243,713,238).

	Number of shares	\$
Balance December 31, 2013	243,713,238	54,094,860

Balance December 31, 2014	25,425,000	0.36	\$ 1,389,382
<b>Balance March 31, 2015</b>	<b>25,425,000</b>	<b>0.36</b>	<b>\$ 1,389,382</b>

As a result of the 13,765,000 unit private placement in November 2011, the Company issued 12,400,000-Warrants to purchase common shares of the Company at a price of \$0.10 per share, and 1,365,000 Broker Warrants to purchase common shares of the Company at a price of \$0.10, until November 17, 2013. The outstanding Broker Warrants expired unexercised and the expiry date of the Warrants was extended to November 17, 2015.

As a result of the 35,053,300 unit private placement in March 2012, the Company issued 17,526,650 2012-Warrants to purchase common shares of the Company at a price of \$0.50 per share, and 2,395,400 Broker Warrants to purchase common shares of the Company at a price of \$0.30, until March 8, 2014. The outstanding warrants expired unexercised March 8, 2014. As a result of the 11,200,000 share private placement in September 2012, the Company

**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

For the periods ended March 31, 2015 and 2014

Unaudited-Expressed in Canadian dollars unless otherwise stated.

issued 672,000 Broker Warrants-II to purchase common shares of the Company at a price of \$0.45 per share until September 13, 2014. The Broker Warrants expired unexercised September 13, 2014.

As a result of the \$5,000,000 IFC financing in June 2013, the Company issued 15,000,000 IFC Warrants to purchase common shares of the Company at a price of \$0.50 per share until June 10, 2017. An “accelerator clause” applies to 50% of the warrants. If the Company has filed a NI 43-101 compliant mineral resource estimate outlining 3,000,000 ounces of gold and the stock price trades above \$1.00 for thirty days, then Unigold may call for exercise of the warrants which, if not exercised, will expire in 60 days.

At March 31, 2015 and December 31, 2014 the Company had warrants issued as follows:

<b>2014</b>				
<b>Exercise Price</b>	<b>Number of Warrants Outstanding</b>	<b>Weighted Average Remaining Contractual Life - Years</b>	<b>Number of Warrants Exercisable</b>	<b>Expiry Date</b>
\$0.15	10,425,000	0.8	10,425,000	Nov.17, 2015

Expired/forfeited – transferred to deficit	(881,123)
Balance March 31, 2015	<b>1,565,047</b>

**9. Share - Based Payment – Employee Stock Option Plan**

The Company has a stock option plan (the “Plan”), the purpose of which is to attract, retain and motivate management, staff and consultants by providing them with the opportunity, through share options, to acquire a proprietary interest in the Company and benefit from its growth. The maximum number of options to be issued under the Plan shall not exceed 10% of the total number of common shares issued and outstanding. The options are non-transferable and may be granted for a term not exceeding five years. The exercise price of the options shall be determined by the board of directors on the basis of the market price of the common shares, subject to all applicable regulatory requirements.

A summary of the Plan activity during the periods indicated is presented below:

**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS***For the periods ended March 31, 2015 and 2014*

<b>\$0.20</b>	<b>12,175,000</b>	<b>2.3</b>	<b>12,175,000</b>	

As at March 31, 2015, there are 12,196,324 options available for grant (March 31, 2014 – 6,446,324). During the quarter ended March 31, 2015, share-based payment expense of \$nil was recorded (March 31, 2014 – \$21,797). In addition, \$nil (2014 – \$21,183) was capitalized to exploration and evaluation assets. The weighted average exercise price of stock options exercisable as at March 31, 2015 is \$0.18 (March 31, 2014 – \$0.23).

**10. Net Loss per Share**

For the three months ended March 31, 2015 and 2014, the outstanding stock options and warrants were not included in the computation of the diluted net loss per share because the effect was anti-dilutive.

Share-based payments charged to exploration and evaluation assets ( <i>Note 7</i> )	–	21,183

**14. Financial Risk Management**

The Company's risk exposures and the impact on the Company's financial instruments are summarized below. There have been no changes in the risks, objectives, policies and procedures from the previous period.

**(a) Credit risk**

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash and other receivables.

Cash is held with a reputable Canadian financial institution, from which management believes the risk of loss to be minimal.

Financial instruments included in other receivables consist of sales tax due from the Federal Government of Canada. Other receivables are in good standing as of March 31, 2015. Management believes that the credit risk concentration with respect to financial instruments included in other receivables is minimal.

**(b) Liquidity risk**

The Company has in place a planning and budgeting process to help determine the funds required to support the Company's normal operating requirements on an ongoing basis and its capital, administrative, and exploration and

## **NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

*For the periods ended March 31, 2015 and 2014*

Unaudited-Expressed in Canadian dollars unless otherwise stated.

evaluation expenditures. The Company ensures that there are sufficient funds to meet its short-term requirements, taking into account its anticipated cash flows from operations and its holdings of cash and cash equivalents.

As at March 31, 2015, the Company has working capital of \$295,650 (December 31, 2014 – \$644,245). The Company's ability to meet its financial obligations is dependent upon securing financing.

As of March 31, 2015, the Company has a cash balance of \$312,418 (December 31, 2014– \$638,850) to settle current accounts payable and accrued liabilities of \$58,145 (2014 – \$49,230). The Company's other current assets consist of other receivables of \$18,281 (December 31, 2014 – \$17,302) and other financial assets and prepaids of \$23,096 (December 31, 2014 – \$37,323).

See also *Note 2 – Going Concern*.

### **(c) Market risk**

At the present time, the Company does not hold any interest in a mining property that is in production. The Company's viability and potential success depends on its ability to develop, exploit, and generate revenue from the development of mineral deposits. Revenue, cash flow, and profits from any future mining operations in which the Company is involved will be influenced by precious and/or base metal prices and by the relationship of such prices to production costs. Such prices can fluctuate widely and are affected by numerous factors beyond the Company's control.

### **(d) Foreign exchange risk**

The Company's financings are in Canadian dollars. Certain of the Company's transactions with its subsidiary, Unigold Dominicana, S.R.L. are incurred in foreign currencies and are therefore subject to gains or losses due to fluctuations in exchange rates. The Company is therefore subject to foreign exchange risk. As at March 31, 2015, the Company had cash balances of \$34,844 (December 31, 2014 – \$44,877) in United States dollars. U.S. \$ accounts payable as at March 31, 2015 were U.S. \$2,900 (December 31, 2014 – U.S. \$nil).

Sensitivity to a plus or minus 5% change in the foreign exchange rate would not have resulted in a significant fluctuation in the loss for the period ended March 31, 2015. The Company does not undertake currency hedging activities to mitigate its foreign currency risk.

### **(e) Interest rate risk**

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company's current policy is to earn interest on bank balances which approximate rates available from investment-grade short-term deposit certificates issued by its financial institutions. The Company periodically monitors the investments it makes and is satisfied with the creditworthiness of its financial institutions. As of March 31, 2015, interest rate risk is minimal since the Company has no interest-bearing debt instruments.

A sensitivity analysis has determined that an interest rate fluctuation of 5% in interest rates would not have resulted in significant fluctuation in the interest income during the period ended March 31, 2015.

### **(f) Fair value of financial assets and liabilities**

Fair value estimates are made at the statement of financial position date based on relevant market information and information about the financial instrument. These estimates are subjective in nature and involve uncertainties in significant matters of judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect these estimates.

**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS***For the periods ended March 31, 2015 and 2014*

Unaudited-Expressed in Canadian dollars unless otherwise stated.

The book values of cash, other receivables, other financial assets, and accounts payable and accrued liabilities, approximate their respective fair values due to the short-term nature of these instruments.

The following is a summary of the Company's financial instruments:

	As at	March 31, 2015		December 31, 2014	
		Carrying Amount	Fair Value	Carrying Amount	Fair Value
Cash		\$ 312,418	\$ 312,418	\$ 638,850	\$ 638,850
Other receivables		18,281	18,281	17,302	17,302
Accounts payable and accrued liabilities		58,145	58,145	49,230	49,230

**15. Capital Risk Management**

The Company considers its capital structure to consist of equity attributable to shareholders of the Company which at March 31, 2015 was \$38,043,204 (December 31, 2014 – \$38,259,919). The Company manages its capital structure and makes adjustments to it, in order to have the funds available to support its exploration and operations activities.

The Company's objective when managing capital is to safeguard the Company's ability to continue as a going concern in order to pursue the exploration of its exploration properties and maximize shareholder returns. The Company satisfies its capital requirements through careful management of its cash resources and by utilizing its existing credit facility or equity issues, as necessary, based on the prevalent economic conditions of both the industry and the capital markets and the underlying risk characteristics of the related assets. Management reviews its capital management approach on an ongoing basis. The Company and its subsidiaries are not subject to externally imposed capital requirements.

**16. Commitments and Contingencies****(a) Legal proceedings**

The Company and its entities are party to certain legal proceedings arising in the ordinary course of business. In the opinion of management, there are no current legal proceedings or other claims outstanding, which, on final disposition, could have a material adverse effect on the financial position of the Company.

**(b) Environmental matters**

The Company has operated in the mineral exploration industry in the Dominican Republic for many years. The enforcement of environmental regulation in the Dominican Republic is evolving and the enforcement posture of government authorities is continually being reconsidered. The Company periodically evaluates its obligations under environmental regulations.

The Company's exploration activities are subject to various federal, provincial and international laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company conducts its operations so as to protect public health and the environment and believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

**(c) Guarantees**

The Company has no guarantees outstanding.

**NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

For the periods ended March 31, 2015 and 2014

Unaudited-Expressed in Canadian dollars unless otherwise stated.

**(d) Contingencies**

The Company is a party to certain employment contracts. These contracts contain clauses requiring that \$nil be paid on termination resulting from a change of control of the Company, \$32,566 be paid on termination for other than cause. As the likelihood of these events taking place is not determinable, the contingent payments have not been reflected in these consolidated financial statements.

**(e) Operating contractual obligations**

Minimum contractual payments over the next five years are estimated as follows:

Year	Total	2014	2015	2016	2017	2018
Office lease	\$ 42,000	\$ 42,000	\$ –	\$ –	\$ –	\$ –
Services	112,000	106,000	6,000	–	–	–
	\$ 154,000	\$ 148,000	\$ 6,000	\$ –	\$ –	\$ –

The Company has entered into leases for office premises. The leases have an average life of nine months (December 31, 2014 – one year) with renewal terms at the option of the lessee at lease payments based on market prices at the time of renewal. There are no restrictions placed upon the lessee by entering into these leases. Payments recognized as an expense were as follows:

Period ended March 31,	2015	2014
Lease payments	\$ 12,465	\$ 12,465

Non-cancellable operating lease commitments:

	As at March 31, 2015	December 31, 2014
Within one year	\$ 42,000	\$ 56,000
After one year but not more than five years	–	–
More than five years	–	–

**17. Segmented Information**

The Company's only activity is mineral exploration and evaluation. All of the Company's land, vehicles, field equipment, and camp and buildings (see *Note 6*) are physically located in the Dominican Republic. All of the Company's exploration and evaluation activities referred to in *Note 7* relate to properties in the Dominican Republic.
